SUPPLEMENT TO
REPORT NO.

1. The production of the Rade Koncar factory in Zagreb, stated to be one of the most important in the Yugoslav electrical industry, is reported to include the following:

Automatic telephones
Machine tools
Motors of 600 HP
High-powered transformers for industrial use, including one of 35,000
volt capacity
Transformers for village use
Generators, low and high-powered
Furnaces for metallurgical work
Machines for textile and chemical industries
Mass-produced "three-phase" electric motors
Electric stoves

2. The factory employs 31 engineers, 113 technicians, about 200 specialist operators, 600 qualified workers, and approximately 500 auxiliary workers, among whom are 350 women.
3. Of 250 new machines which are to be produced by the factory for its own use, twenty percent have been completed.
4. The construction department is also working on new houses for technicians and workers, rest rooms, lecture halls, gymnasiums, messes, state shops, et cetera. It is planned that workers shall spend most of their time in the factory precincts.
5. The building of a fire station and a first aid department has just been completed. A chemist has been appointed to take charge of the latter.
